To Whom It May Concern:

This comes as a letter of recommendation for Sanket Kadam. Sanket served as my Supplier Quality Assurance Intern from January to August 2021. His responsibilities included maintaining a supplier PPAP tracker, reviewing and monitoring supplier 8D responses to quality issues, and dispositioning suspect supplier components.

I have watched him grow from a shy, introvert to a confident, comfortable engineer, leading meetings with suppliers to achieve program targets for PPAP timing and pushing for robust resolutions to quality issues.

One thing that did not change during Sanket's time on the SQA team was his attitude. From day one he had a huge desire to learn and a willingness to take on any task, despite how menial it may have seemed. Sanket developed relationships with other members of the larger quality team as well as cross functional team members from program managers, engineers, production managers and operators.

Sanket is a big proponent of continuous improvement and even took initiative to volunteer to participate in workshops focused on making one of the production areas more efficient and conducive to quality improvements. He also completed the layout for the process flow of our containment area when it moved to a different location and often gave suggestions to our team on improvements for shared documents and general tips from his computer knowledge.

These are just a few examples that show why Sanket would be the perfect candidate for any future role. Feel free to contact me at 313-530-7699 if I can provide further insight.

Best Regards,

A handwritten signature in dark ink, appearing to read "Roshan P. Raines-Yilma". The signature is fluid and cursive, with a long horizontal stroke at the end.
